

GOMOTION a new company that is making running in the dark easy and risk free. The product, depending on your use, is a variation of itself.

The Trail Runner LiteVest features a low-profile, lightweight, breathable mesh pack with 3-Watt LED mounted at chest level for maximum trail visibility and comfort, and a hydration cell option. Adjustable features include shoulder strap adjustment from the lower back area and a LED chest-strap slider more maximum chest comfort and fit. The CoreBeam™ chest-mounted LED technology includes: 3-level brightness control, wide range and adjustable beam width control via rotary dial, and barrel-mounted FluidDrive vertical-pivoting light. Fitting out the pack are two red tail-lights, 4 zip pockets for cell phone and other accessories, a compartment for a standard hydration pack and a low-battery signal light to alert the runner well in advance of low battery life.

The Street Runner LiteVest features a super-lightweight, adjustable mesh harness with padded straps, a 1-Watt LED at chest level for maximum trail visibility and comfort. Adjustable features include shoulder strap adjustment from the lower back area and a LED strap slider more maximum chest comfort and fit. CoreBeam™ chest-mounted LED technology includes: 3-level brightness control, wide range and adjustable beam width control via rotary dial, and barrel-mounted FluidDrive vertical-pivoting light. Other features include two red tail-lights, 1 center pocket for cell phone and a low-battery signal light to alert the runner well in advance of low battery life. The Street Runner can also accept the GoMotion™ re-chargeable battery.

And last the Sport Runner LiteVest features a contoured, waist-level running belt designed as a lightweight solution for walkers and recreational runners with breathable mesh construction. It features a 1-Watt LED with the same CoreBeam™ functions as the LiteVest including: brightness control, beam width and light direction adjustment. Two rear tail-lights, two zip pockets for cell phone and accessories, and has a low-battery signal light round out this easy-to-use LiteBelt™.

I have not found a price for them yet but rest assured I will have one now that we are running out of daylight.

Cheers
